

6240 siamet SCM

The flexible 6240 siamet SCM offers high edge stability

The flexible 6240 siamet SCM offers high edge stability

The 6240 siamet SCM has been especially developed for sanding application where edge stability and flexibility are very important.

- ▶ Consistent surface finishes even on curved workpieces
- ▶ High level of flexibility
- ▶ High edge stability, high initial tearing resistance
- ▶ Long lifetime

Product profile

Grit type:	Aluminium oxide / blue-fired
Backing:	Nonwoven
Coating:	Mechanical
Bonding:	Resin over resin

Applications

- Finishing to prepare for coating and electroplating
- Deburring
- Removal of discolouration
- Smoothing and blending of flaws
- Structuring and final sanding
- Surface treatment

Materials

Unalloyed / low-alloy steel; High-alloy steels; Non-ferrous metal; Aluminium

Technology

SCM belts; X-LOCK

Use
