

# 6240 siamet SCM

The flexible 6240 siamet SCM offers high edge stability

### 6240 siamet SCM

## The flexible 6240 siamet SCM offers high edge stability

The 6240 siamet SCM has been especially developed for sanding application where edge stability and flexibility are very important.

- Consistent surface finishes even on curved workpieces
- High level of flexibility
- High edge stability, high initial tearing resistance
- Long lifetime

#### Product profile

Grit type: Backing: Coating: Bonding:

Use

Aluminium oxide / blue-fired Nonwoven Mechanical Resin over resin

🗞 🔍 🔍 📚 🀼 🖉

#### Applications

- Finishing to prepare for coating and electroplating
- Deburring
- Removal of discolouration
- Smoothing and blending of flaws
- Structuring and final sanding
- Surface treatment

#### Materials

Unalloyed / low-alloy steel; High-alloy steels; Non-ferrous metal; Aluminium

#### Technology

SCM belts; X-LOCK
