**sia Abrasives and FSC™ – we pledge our commitment**

### Climate-neutral

#### CO<sub>2</sub>-neutral

Since 2020, the entire sia Abrasives site in Frauenfeld has been CO<sub>2</sub> climate neutral (Scope 1 & 2)

### Sustainable packaging

#### Recycled plastic

Adaptation of recycled packaging to the new standard at sia Abrasives with at least 30 % recycled PE

#### Mineral oil-free printing inks

Packaging is printed only with natural oil-based printing inks

#### PVC replacement in packaging

Plastic replacement of PVC and introduction of at least 30 % recycled PP/PE/PET

## FSC™ – An important service

The Forest Stewardship Council (FSC™) is an independent, non-governmental organisation dedicated to the ethical and responsible management of the world's forests.

FSC™ is the most trusted organisation when it comes to safeguarding essential environmental and social standards in the world's forests. With globally recognised standards, unparalleled integration of all relevant interest groups and the support of big-name companies as well as highly respected environmental and social organisations, the FSC™ is widely regarded as the most credible solution for sustainable forestry management. The certificates are issued by independent third parties and are verified annually. Around the world, some 200 million hectares of forestry are FSC™-certified.

For more detailed information, visit the FSC™'s global website: [fsc.org](https://www.fsc.org)

## sia Abrasives and FSC™ – we pledge our commitment

For several years we have been working towards reducing our environmental footprint without compromising on product quality.

We take responsibility and act in a way that is sustainable and that preserves our natural resources.

We have been successfully FSC™ certified since 2021 (licence number: FSC™ C168085). The validity of our FSC™ Multisite certificate covers all sites in Europe and North America.

The responsible management of forests is a subject close to our hearts, which is why we are one of the world's first abrasive manufacturers to use exclusively FSC™-certified paper for our wood-based abrasive products (paper backings).

By procuring raw materials that meet FSC™ standards, sia Abrasives is taking another important step and making a valuable contribution to future generations.

## What are the aims of the FSC™?

The FSC™'s aim is to pave the way to better forestry management the world over.

FSC™ considers itself a platform where representatives with different interests in forestry can come together and forge a consensus about responsible forestry management.

This consensus provides the foundation from which to develop management standards and derive marketing mechanisms for forestry products created by these standards.

For more detailed information, visit the FSC™'s global website: [fsc.org](http://fsc.org)

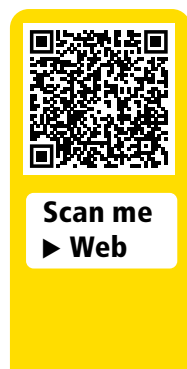

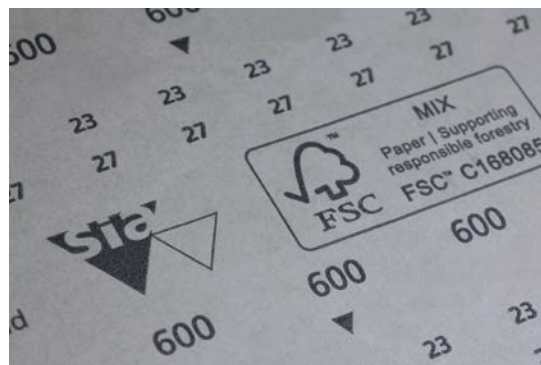

## Labelling of the abrasive products

We are committed to using only FSC™-Mix certified raw materials in the manufacture of flexible abrasives on paper backing at the Frauenfeld facility.

We only use products from FSC™-certified and controlled sources for our paper backing.

The certified abrasive products can be clearly identified by an FSC™ label and corresponding licence number on the reverse of the abrasive. The licence number is: **C168085**
