

2546 siabite jj

A high-performance abrasive specially designed for high-alloy steel

A high-performance abrasive specially designed for high-alloy steel

Specially designed for high-alloy steel and other hard to grind metals, 2546 siabite jj consistently delivers maximum performance in applications from material removal to final sanding — thanks, among other things, to its high adaptability to contours, curves and profiles.

- High removal rate thanks to ceramic grit
- Active additives with a cooling effect greatly reduce discolouration
- ► Highly adaptable to contours, curves and profiles
- ► High performance on hard-to-grind materials

Product profile

Grit type: Ceramic aluminium oxide

Grit type.

Grit range:

Grit range:

Go-320; 400

Backing:

JJ-wt cloth

Coating:

Closed

Bonding:

Resin over resin

Special coating:

Cooling additive

Use

Applications

- Removal of discolouration
- Stock removal
- Surface treatment
- Deburring
- Smoothing and blending of flaws
- Structuring and final sanding

Materials

High-alloy steels

Technology

microtec; siafast
