

2951 siatur h

For perfect finish on profiled workpieces with radii from 2–5 mm

For perfect finish on profiled workpieces with radii from 2–5 mm

2951 siatur h excels in manual and portable machine sanding applications with radii from 2–5 mm thanks to its high adaptability and dimensional accuracy, especially in jobs such as keying, intermediate sanding and final sanding on paint, lacquer, body filler and primer filler.

- ▶ Can be torn to any desired format
- ▶ Best adaptability in the siasoft version
- ▶ Highly adaptable to contours and shapes
