

9170 siamop

Flap wheels for structure finishing and fine sanding

Flap wheels for structure finishing and fine sanding

The flap wheels of the 9170 siamop series ensure an even sanding pattern and a perfect finish during fine sanding of surfaces profiles, contours and pipes in fields such as container and apparatus manufacturing.

- ▶ Maintains a uniform abrasive finish until completely worn
- ▶ Flap wheels adapt to the contours of the workpiece during use and can be profiled
- ▶ Short set-up time

Product profile

Grit type:	Aluminium oxide
Backing:	Cotton fabric
Coating:	Electrostatic
Bonding:	Resin over resin

Applications

- Fine sanding of surfaces
- Fine sanding of profiles and contours
- Applications in container and apparatus construction
- Applications: profiles and pipes/tubes
- Structuring and finishing

Materials

Unalloyed / low-alloy steel; High-alloy steels; Non-ferrous metal
