

2718 siapan +

The reliable all-rounder

The reliable all-rounder

The reliable all-rounder 2718 siapan+, with a robust yet flexible polyester backing and a wide grit range, ensures precise, high-quality sanding results in all applications, from calibration sanding to fine sanding.

- ▶ Suitable for the entire sanding process from surface calibrating through to fine sanding
- ▶ High tearing resistance
- ▶ High climate resistance
- ▶ Can repeatedly be removed and remounted into the sanding machine
- ▶ Can be used as wide belt and segmented belt
- ▶ Easy handling
- ▶ Waterproof and washable

Product profile

Grit type:	Silicon carbide	
Backing:	Z-wt cloth, polyester	
Coating:	Electrostatic open	P036 – P100
	Closed	P120 – P180
Bonding:	Resin over resin	

Use

Applications

- Calibrating
- Intermediate sanding
- Fine sanding
- Keying of chipboards, MDF boards and hardboards
- Keying of laminate panels (back)
- Keying of plywood, wood core plywood and solid wood panels
- Keying of plywood, wood core plywood and solid wood panels
- Calibrating solid wood
- Coarse sanding in parquet and plywood manufacturing
- Coarse sanding in plywood manufacturing
- Coarse sanding of solid wood and wood-based materials

Materials

Chipboard; MDF board; HDF board; Wooden base; HPL laminate; Solid surface material; Mineral fibreboard; Solid wood
