

7950 siapower-foam

Efficient for a perfect finish in dry sanding applications

Efficient for a perfect finish in dry sanding applications

7950 siapower-foam: Efficient solution for scuffing, fine sanding and polishing preparation in dry sanding applications. The system with multi-hole pattern and anti-clogging coating ensures a low-dust surface. The impressive finish is particularly remarkable on filler and lacquer thanks to the super-flexible, pressure-equalising foam backing.

- ▶ Very high abrasive performance with a perfect finish
- ▶ Impressive dry sanding with immediately visible results
- ▶ The anti-clogging coating extends the service life and reduces cleaning effort
- ▶ Pressure-equalising foam gives perfect surface finish
- ▶ Full surface extraction and a low dust working environment thanks to the multi-hole pattern

Product profile

Grit type:	Aluminium oxide	600 – 2000
Grit range:	600-2000	
Backing:	Foam	
Coating:	Special process	
Bonding:	Resin over resin	
Special coating:	Stearate	

Applications

- Fine sanding of primer filler
- Producing a matt finish for blending
- Preparation for polishing on high-gloss surfaces

Materials

Lacquer; Colour; Old paint; Primer filler; Primer coat

Use
