| Claim: | The ceramic fibre disc for maximum performance on stainless steel and steel |
| Сору: | The coarser grits of the 4582 siaramic series have been developed to have an exceptionally high material removal speed for stainless steel and unalloyed/low-alloy steel. In addition, the shaped siaramic grit increases the disc's service life. The ceramic fibre disc is also characterised by constant and even sanding in the finer grits on stainless steel (thanks to the cooling agent) and on unalloyed/low-allow steel, resulting in an outstanding surface finish. |
